5–Step IDN registration Process for ".ලංකා" and ".இலங்கை"

Exercise 01

This exercise follows to enable ". டூவி ". இலங்கை" domains for Iknog.lk

Example: Iknog.Ik –>>> கோல் and லக்னொக்.இலங்கை

Guideline step-by-step register domain:

01. Make sure you have "lk" Identity and hosting ready.

Yes. I have "lknog.lk" and hosted in the following name servers ??

02. Prepare domain in UNICODE

Use a suitable tool for Unicode conversion and prepare the domain in Unicode

Online tools Unicode converter for English to SINHALA: https://www.eslims.gov.lk/eLand/lib/keyboard/t1.html Unicode converter for English to tamil: https://vikku.info/indian-language-unicode-converter/tamil-unicode-converter.h tml

Prepared the following in Unicode domain for registration

ලක්න**ොග්<mark>.ලංකා</mark>**

ல்க்னொக்<mark>.இலங்கை</mark>

**Test on the browser

Please note, like ".lk"(Top Level Domain), you can't change "._ேவ" and " .இலங்கை". Also, the name should be relevant to the existing domain name

03. Prepare domain in PUNYCODE

LK Domain needs the Punycode of your domain to update the zone file.

Online tool for convert domain it puny code; xn--3zce6d2bvdc8<mark>j.xn--fzc2c9e2c</mark> xn--clca3d8a0ipabd<mark>.xn--xkc2al3hye2a</mark>

04. Fill out the registration form

Visit "<u>www.idn.domains.lk</u>" and fill out the form

05. Submit

Finally you will register

- ලක්න**ොග්.**ලංකා
- ல்க்னொக்.இலங்கை

Exercise 02

Register domain for you

Your domain ::

Your domain unicode::

Your domain puny code to send registry:

End
