

# SLACK Setup Example

## Creating a Workspace to your Institute

- If your Institute doesn't have a slack workspace and if you are the **Network Admin**, We suggest signing up for a Free account. Others can be added as members later.

- Use your Official Email Account

## First, enter your email

We suggest using the email address you use at work.

 Continue with Apple

OR

 @thilinaathirana.xyz 

Continue

- Click Create a Workspace

# Get your team started on Slack

Slack is a new way to communicate with your team. It's faster, better organized, and more secure than email – and it's free to try.

[Create a Workspace →](#)

It's okay to send me emails about Slack.

By continuing, you're agreeing to our [Customer Terms of Service](#), [Privacy Policy](#), and [Cookie Policy](#).

- ◆ Give your Institute's name and make sure below option box is ticked.

ThilinaPathirana Inc.

Step 1 of 3

## What's the name of your company or team?

This will be the name of your Slack workspace – choose something that your team will recognize.

ThilinaPathirana Inc.

Let anyone with an @thilinauthorana.xyz email join this workspace.

Next

- ◆ Type Monitoring, this will create a specific channel which can be later used for alerting

ThilinaPathirana Inc.

Step 2 of 3

## What's your team working on right now?

This could be anything: a project, campaign, event, or the deal you're trying to close.

Monitoring

Next

- ◆ Add email addresses of your other colleagues.

# Who do you email most about **monitoring**?

To give Slack a spin, add a few coworkers you talk with regularly.

[+ Add another](#)

[Get a shareable invite link instead](#)

**Add Teammates**

Skip this step

- Highly recommend to download the application.

**With the Slack app, your team is never more than a click away**

 **Download Slack for macOS**

Not now, continue in browser

- Once completed, you will see Monitoring Channel

## Creating APP

- Go to <https://api.slack.com/messaging/webhooks> and follow first three steps.
- Create SLACK APP by giving an appropriate App Name, Select your workspace and by clicking Create App.

## Create a Slack App

### App Name

Monitoring Bot

Don't worry; you'll be able to change this later.

### Development Slack Workspace

 ThilinaPathirana Inc.

Your app belongs to this workspace—leaving this workspace will remove your ability to manage this app. Unfortunately, this can't be changed later.

By creating a Web API Application, you agree to the [Slack API Terms of Service](#).

Cancel

Create App

### ◆ Select Incoming Webhooks

#### Add features and functionality

Choose and configure the tools you'll need to create your app (or review all our [documentation](#)).

##### Building an internal app locally or behind a firewall?

To receive your app's payloads over a WebSockets connection, enable [Socket Mode](#) for your app.

##### Incoming Webhooks

Post messages from external sources into Slack.

##### Interactive Components

Add components like buttons and select menus to your app's interface, and create an interactive experience for users.

##### Slash Commands

Allow users to perform app actions by typing commands in Slack.

##### Event Subscriptions

Make it easy for your app to respond to activity in Slack.

### ◆ Activate Incoming Webhooks by making the switch to On

## Incoming Webhooks

### Activate Incoming Webhooks

On

Incoming webhooks are a simple way to post messages from external sources into Slack. They make use of normal HTTP requests with a JSON payload, which includes the message and a few other optional details. You can include [message attachments](#) to display richly-formatted messages.

Adding incoming webhooks requires a bot user. If your app doesn't have a [bot user](#), we'll add one for you.

Each time your app is installed, a new Webhook URL will be generated.

### ◆ Create a new Webhook by clicking the button Add New Webhook to Workspace

## Webhook URLs for Your Workspace

To dispatch messages with your webhook URL, send your [message](#) in JSON as the body of an [application/json](#) POST request.

Add this webhook to your workspace below to activate this curl example.

Sample curl request to post to a channel:

```
curl -X POST -H 'Content-type: application/json' --data '{"text":"Hello, World!"}' YOUR_WEBHOOK_URL_HERE
```

Webhook URL	Channel	Added By
-------------	---------	----------

No webhooks have been added yet.

[Add New Webhook to Workspace](#)

- ◆ Include Monitoring Channel to the Bot

This app was created by a member of your workspace, ThilinaPathirana Inc..

**Monitoring Bot is requesting permission to access the ThilinaPathirana Inc. Slack workspace**

**Where should Monitoring Bot post?**

# Monitoring Bot requires a channel to post to as an app

# monitoring

Cancel

Allow

- ◆ Once the webhook is created, copy the url to be pasted on your NMS, but make sure to keep url values a secret. (You can use the sample content to check connectivity from your console)

Add this webhook to your workspace below to activate this curl example.

Sample curl request to post to a channel:

```
curl -X POST -H 'Content-type: application/json' --data '{"text":"Hello, World!"}'  
https://hooks.slack.com/services/T021FDTH82Z/B021FDTH82Z/wec82gW147fpS
```
